

Chien Hsin University of Science and Technology
2021 Industry-Academia Collaboration Program for Indonesian Student

Program Name	Electrical Engineering -Energy and Automation		
School	Chien Hsin University of Science and Technology	Department	Electrical Engineering
Field of Program	Electrical Engineering		
Project Duration	2020.09.01 ~2023.07.31		
Number of students	30		
Number of Full-time teachers	25		
Program Introduction	<p>The Electrical Engineering department of Chien Hsin University cooperates with the government's policies and starts the plan of academia-industry cooperation-training for Indonesian students. The course planning of this program focuses on both theory and practice. We teach students to effectively use science and technology in practice, which also made the graduates of the class meet the needs of the job market.</p> <p>The educational objective of this program is to cultivate professional electrical engineers with competence not only in analysis, development, and manufacturing, but also in maintenance in the fields of renewable energy, industrial power distribution system, refrigeration and air -conditioning, industrial automation.</p> <p>If graduates choose to continue their studies, they will have a solid professional knowledge and skill foundations to successfully complete higher education.</p> <p style="text-align: center;">http://www.ee.uich.edu.tw/zh_tw/international_students</p>
